Electronic Communication Devices - Dr. Terhune

Dr. Terhune asked Mr. Giles to address the issue of College provided electronic communication devices for employees. Mr. Giles informed the Council that if cell phones, wireless handheld

devices, beepers, or data cards are ever used for personal communications, they are subject to tax at the fair market value of the item and service. With increasing requests for these units from employees, SCC needs to develop policies and procedures consistent with this information to manage these devices. The Council discussed options including prohibiting non-College use of the unit – which would require strict review of call logs, having employees contribute to the cost of the phone, or requiring employees to provide their own units and plans. Mr. Giles said that a state committee has been formed to develop model policies for state agencies. The Council agreed that they would not be willing to monitor individual use of electronic devices and decided to postpone further decisions until after the model policies have been released.
